My Dearest Judy

Here it is another 37th of the month here which reminds me that after a few more 37th's passing it again will be your birthday.

I met a young fellow who speaks good German and with the little Jewish I understand I'm able to understand him fairly well. With each passing day I'm able to understand the language better and every now and then I add a few words to my German vocabulary. When I get into Germany I don't think I'll have to much difficulty but the only point is we are forbidden to converse with the German people. You should know that if a GI in Germany is found speaking with a civilian, he is heavier fined to the tune of seventy dollars.

The weather is getting much cooler now but every thing still remains about the same. I miss you and your smiling face.
